

Unified Network Security Gateway

DataSheet – CP100

WiJungle Virtual Central Console platform support full set of features as Central Console hardware appliances. By allowing organizations to leverage virtual environment, Virtual Central Console platform eliminate the need for dedicated hardware, reduce cost of ownership and simplify future upgrades. With the much needed power to centrally manage multiple WiJungle Unified Network security appliances across distributed networks, it equips Enterprises for actions like rapid deployment of organization-wide security policies and updates.

Specifications

Centralized Appliance Management

- Individual Appliances
- Automatic Discovery
- Appliance Provisioning Wizard
- Manual addition
- Appliance Groups: Mode, Firmware, City, Regular Expression using Appliance Name, Company and more
- Appliance Search: Appliance Name, Model, Key, Firmware, Company and more

Policy Enforcement

- Network configuration
- Web Filter
- Application Filter
- QoS Policy
- IPS
- Anti Virus
- Anti Spam
- Web Application Firewall
- Logs & Reports
- VPN
- User, User Groups and Guest Users
- Authentication configuration
- Access Time, Surfing Quota, Data Transfer
- System Administration & Configuration
- System Maintenance - Updates and Services
- Certificates, Certificate Authority, CRL

Logs and Events

- Event Viewer - AV, IPS, System Logs, Authentication and Audit logs
- Log Viewer - Web Filter, Anti Spam, Firewall,
- Authentication, Application Filter, WAF

Upgrade Distribution Service

- Security Upgrades
- AV, IPS & Application Signatures
- Web Filtering Categories
- WiJungleOS Firmware Updates
- Anti-Spam

Appliance Monitoring & Alerts

- Dashboard for Appliance Group, Individual Appliance
- Appliance Monitor Graph
- Alerts - Email, Slack, Flock, Telegram, Skype, Trello
- Resource Utilization: CPU usage, Memory usage, Disk usage
- Security Status: IPS threats, Virus, Spyware, Bot, DDoS, Spam mail
- Productivity: Unhealthy surfing, Connectivity, Appliance connection, Gateway status change, VPN connection status change, HA Status Change
- Subscription Module Status

Configuration Management

- Template-based configuration
- Template type - Global, Appliance-based, Clone
- Configuration Synchronization
- Backup and Restore
- Scheduled and Manual backup
- Auto Backup Frequency - Daily, Weekly, Monthly
- Backup over Email, FTP, NAS or CP
- Backup Repository of Appliances

Control and Logging

- View change list of affected configuration settings
- View configuration changes details
- Compare different versions of configurations
- Take configuration snapshot
- Roll-back to previous configuration
- Compliance Management - Audit trail for policy and device changes

Communication

- Secure Encryption
- Mutual Authentication
- HTTP, HTTPS, Syslog & Secure Syslog

System Management

- Web Based User Interface
- Command Line Interface
- Web2.0 Compliant UI

System Administration

- Role-based Granular control over Appliance and Appliance Groups
- Pre-defined and Custom Administrator profiles
- Health Monitoring
- Central Platform - Managed Appliances
- RAID Support (Opt.)

Hardware

- RAM - 8 GB
- SSD - 500 GB or Higher (2 Storage Bay)
- Gbps Ethernet Ports - 6 Copper
- 2 USB Port, 1 COM

Support

- 24*7 Call and Email Support
